# WEATHER OF CONCERN

## Weather of Concern

Northern California:

- Seasonal temperatures this weekend, then hot and dry next week, with widespread triple digit highs in the Central Valley by mid week. Smoke from wildfires will continue to impact air quality.

Southern California:

- Very warm dry weather will prevail this weekend under a high pressure ridge. Onshore flow will bring areas of night and early morning low clouds near the coast through Monday. The high pressure ridge will strengthen again Monday and Tuesday, bringing hotter conditions, followed by increasing monsoonal moisture and slight cooling for the second half of the week.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

**\*\*\*High Risk Today for Far Eastside and Eastern Portion of the Northern Sierra due to Strong SW Wind and Low Relative Humidity (RH)\*\*\***

**\*\*\*High Risk Today for Western Sacramento Valley due to Gusty Wind and Low RH on Saturday\*\*\***

**\*\*\*Isolated Thunderstorms This Afternoon Siskiyou and Modoc Counties\*\*\***

For the next several days low pressure will be offshore to the west of northern CA and strong high pressure will be centered over the Desert SW. The low pressure area will have more impact on the region for the next few days, and today a disturbance in the SW flow will produce more wind across the region, along with a chance of thunderstorms in the far north.

W-NW winds will increase again this afternoon through the coastal range and over the higher terrain in the east. By late afternoon gusts of 30-35 mph will spread through the gaps and passes of the coastal mountains and into the western Sacramento Valley. Areas from the Cascade-Sierra crest east will see SW-W gusts of 40 mph and locally higher late today. These winds will die off late tonight. Minimum RH values will be 5-15% east of the crest and 8-20% in the windy areas west of the crest. Winds on Sunday will be quite a bit lighter.

The disturbance is also expected to produce a few thunderstorms this afternoon from western Siskiyou County and northern Trinity County east across Modoc County. There may also be a stray shower or thunderstorm in northern Lassen County as well. A direct hit from a storm may produce 1/4 inch of rain. Beginning Tuesday or Wednesday the high will strengthen and become the dominant weather feature, leading to a return of hot and dry weather. There is a chance that monsoon moisture could move northward and produce more thunderstorms Friday and Saturday.

## **SOUTHERN CALIFORNIA**

**\*\*\*Strong westerly winds across the desert passes through Sunday morning\*\*\***

**\*\*\*Gusty northerly nighttime winds over Santa Barbara County and the Grapevine through Monday\*\*\***

**\*\*\*Very dry through Tuesday\*\*\***

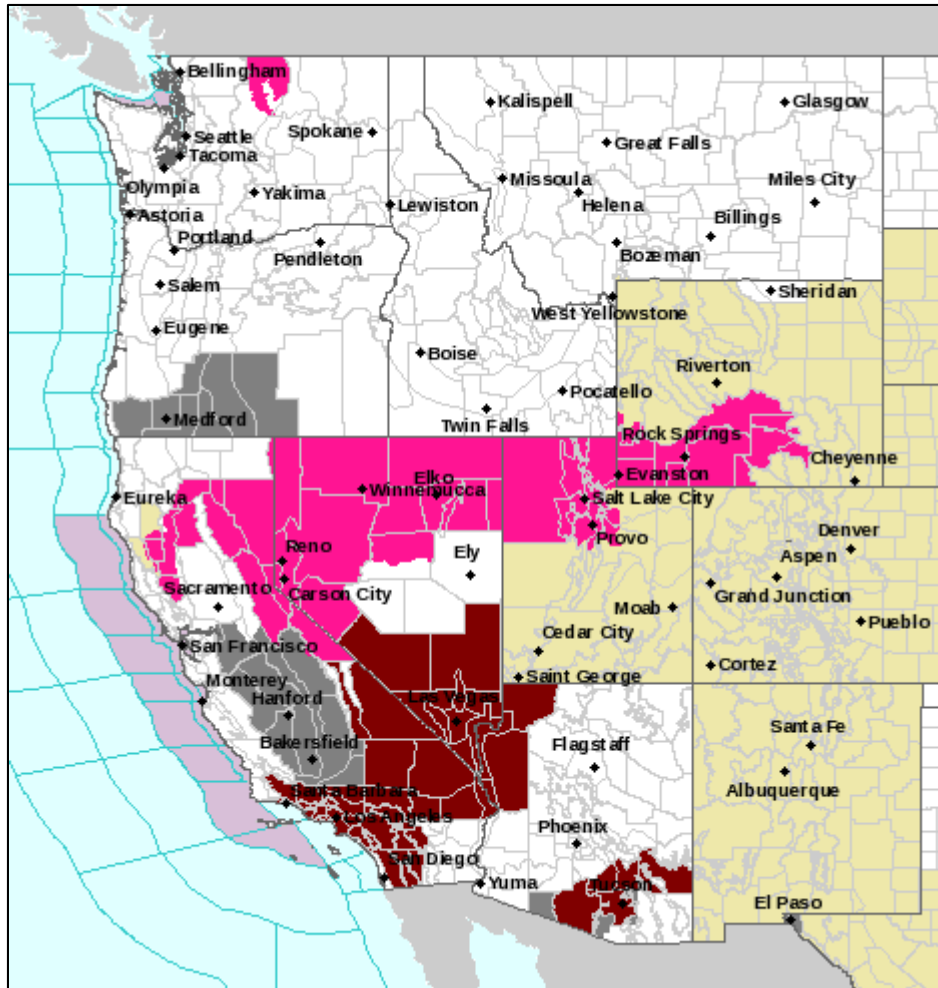

**\*\*\*Hot next week\*\*\***

A trough dropping into Northern California from the Pacific Northwest will bring westerly winds of 20 to 30 mph with gusts to 50 mph to the desert passes through Sunday morning. These winds will decrease to 15 to 25 mph with gusts to 40 mph Sunday afternoon and evening and then become light by Monday morning. Northerly nighttime winds of 15 to 25 mph with gusts to 40 mph will surface across much of Santa Barbara County and the Grapevine through Monday. Temperatures will be near to a little above normal this weekend as our region will be in between the trough over Northern California and high pressure over the Desert Southwest. Maximum temperatures will be in the upper 70s and 80s across the mountains and 90s to 102 in the valleys. Widespread triple digit heat will occur across the valleys and foothills of Southern California starting Monday and across the lower elevations of Central California starting Tuesday as the high over the Desert Southwest strengthens and expands westward. Minimum humidity will be mainly in the single digits and teens away from the coastal areas through Tuesday and there will be poor nighttime humidity recovery. High pressure will move northward into the Great Basin allowing humidity to increase across Southern California starting Wednesday and across Central California starting Thursday. Isolated to scattered afternoon showers and thunderstorms will occur over the mountains and deserts of Southern California east of the Cajon Pass Wednesday through the end of next week and over the Sierra and Northern Deserts late next week. Winds will be light across the region Tuesday through the end of next week, except there will be strong and erratic winds in and near any thunderstorm that develops.
